**Assignment 1:** Ensure the script checks if a specific file (e.g., myfile.txt) exists in the current directory. If it exists, print "File exists", otherwise print "File not found".

**Solution :**

A terminal window with a dark purple background. The title bar at the top reads "rps@rps-VMware-Virtual-Platform: ~/Desktop/Shell\_Script\_Assignment". The terminal contains a shell script with the following lines: 

```
file="myfile.txt"
if [ -f "$file" ]
then
    echo "File exists"
else
    echo "File does not exist"
fi
```

 The script is currently at the end of the last line, with a cursor and a tilde (~) indicating the prompt.
